After a strong first-half in which AI Hard Tech proxies rallied 33% on average in our defined Chinese AI equity universe, they have experienced a significant pullback from their June peaks alongside the sharp reversal of the global AI trade, with **STAR50, ChiNext, and CSI1000 correcting 20%+ from their recent highs**. In this edition of our AI Changes The Game series, we present 10 indicators/signals on market pricing, risk appetite, flows, positioning, policy, and fundamentals to assess the tactical risk and reward for Chinese AI Hard Tech equities and to gauge the maturity of the correction cycle.

Bottom-line: a decent portion of the prior speculative length, valuation excess, leverage, and positioning crowdiness in the AI Hard Tech trade has been taken out in the latest drawdown, but we think likely elevated market volatility in the near term warrants continued focus on uncorrelated assets within and outside of the Chinese AI ecosystem. Key strategies and ideas for diversification and idiosyncrasy: a) scaling into select H-share Internet/Soft Tech; b) policy beneficiaries such as GS 15FYP Portfolio and **domestic- vs export-oriented AI names**; c) **oversold non-tech stocks with earnings upgrades**; and, d) **alpha in the IPO market and cash returns**.

Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to www.gs.com/research/hedge.html.

Where are we in the AI (Hard Tech) correction cycle? 10 indicators/signals we are watching

1) Return dispersion and factor rotation

As detailed in our recent reports ([Asia](#), [China](#)), inter- and intra- **return divergence across regional markets, sectors, and themes surged to unprecedented levels in 1H26**. In China, the principle factor driving the spreads was the AI Hard vs Soft Tech divide, as exemplified by the 100%+ relative return gap of STAR50 over HSTECH in the first 6 months of the year, matching the peaks in early 2021 when dispersion skyrocketed during the Covid-related stimulus rally. Generally, dispersion tends to rise when market beta and investors' risk appetite improves, with Size (small) and Growth (high) often leading in a bull cycle. However, the outperformance of these pro-cyclical styles has corrected sharply alongside the unwind of the AI Hardware trade globally in the past month, and has now returned to the long-term averages for Soft Tech (vs. Hard Tech) and even at fairly extreme levels for Momentum and Size, suggesting to us that **the velocity of the drawdown and style/factor rotation should start to moderate** from a price momentum perspective.

Source: Factset, MSCI, Goldman Sachs Global Investment Research

Exhibit 4: Momentum, Size, and Growth have seen deeper corrections in the past few weeks

Source: Factset, MSCI, Goldman Sachs Global Investment Research

2) Market breadth and concentration

Concentration risk manifests in many facets in the equity universe, and we focus on market cap/return, volume, and factor concentration for the purpose of this study. On returns, **90% of STAR50 returns ytd are contributed by top-10 outperformers**, vs. 23% in early 2021 and 46% for ChiNext in mid-2015. The concentration of returns is also reflected by the rising market cap representation by Hard Tech equities in A-share benchmarks, most notably in the ChiNext and the STAR universes. Similarly, volume concentration has risen to recent-year highs, with the tech sector, ChiNext, and STAR50 representing 26%, 14%, and 6% of total cash turnover in the A-share market. Pairwise correlation (average correlation of all stock pairs), an indicator measuring to what extent the market is trading macro forces (high correlation) or idiosyncratic micro themes (low correlation), shows that the latter, most likely **AI and Tech**, remains the dominant theme among investors across the China equity universe.

Exhibit 5: Return concentration in the latest correction episodes is comparable to that in previous major market downturns

Source: Factset, Wind, Goldman Sachs Global Investment Research

Exhibit 6: Return contribution/concentration has dropped significantly in HK, but remains high in A shares

Source: Wind, Factset, Goldman Sachs Global Investment Research

Exhibit 7: Turnover contribution stays elevated for A-share Hard Tech and small/mid caps

Source: Wind, FactSet, Goldman Sachs Global Investment Research

Exhibit 8: Stock return correlations are still at recent-year lows, implying that AI remains the dominant driving force of equity returns

Source: MSCI, FactSet, Goldman Sachs Global Investment Research

3) Equity multiples and valuations

Valuations recently climbed to local highs for A-share (hard) tech companies, with ChiNext trading at 26x fP/E on a cap-weight basis and STAR50 commanding 50x fP/E at the median stock level at their respective peaks in June. The de-rating since then has pushed the **equity multiples of A-share Hard Tech companies down to or below their long-term averages**, especially on a PEG basis when their growth potential is taken into account. That said, valuations are arguably rich for STAR50 names on an absolute scale, and A-share names across Chinese AI ecosystem have closed their valuation (discount) gaps vis-a-vis their global peers post the latest global AI selloff, implying to us that **valuation risks have lessened, but are far from entirely discounted/removed**.

Exhibit 9: Headline index valuations for A-share Tech companies have normalized

Valuations - China AI vs World ex-China AI

Source: FactSet, IBES, Goldman Sachs Global Investment Research

4) Leverage in the stock market

Margin financing balance remains the most transparent and timely proxy for levered exposures in A shares as leveraged ETFs (or leveraged fund products) are not allowed in the onshore equity market. Aggregate margin balance and its representation in free-float market cap have both retreated from their all-time highs (now to Rmb2.6tn and 5.5% of free-float market cap, down from Rmb3tn and 6.0%), but still above their historical norms, suggesting that the de-leveraging cycle, if it continues, could be still at its early stages compared to the ones in Korea and Taiwan. However, the **effective system-wide leverage at present**, encompassing uncollateralized consumer loans, offshore-listed leveraged ETFs, and other equity-linked structured products (e.g. snowball derivatives) of which data is not well populated, should be **meaningfully lower than the peak in 2015** when off-balance-sheet borrowing was prevalent among individual investors. **One area of concern is the concentration of leverage in AI Hard Tech**, where top-10 percentile of stocks currently make up of 30% of the total outstanding margin balance, the highest ever.

Exhibit 12: Margin leverage requirements comparison table

Market	Leveraged ETFs		Stock margin trading				
	Underlyings	Leverage (on local exchanges)	Minimum Initial Margin Requirement (in Equity to Total Market ratio [^])	Max Leverage	Maintenance Equity%	Grace Period	Liquidation Mechanism
A-shares	N/A	N/A	50% (equivalent to 100% Collateral Ratio ^{^^} , raised from 80% in January 2026, applying only to newly opened margin contracts); ETFs also eligible for margin trading	2.0x	~23% (implied from 130% Maintenance Collateral Ratio)	T+1; Some brokers may add a tighter "instant liquidation line" at 110% or 115% Collateral Ratio	Forced liquidation at T+2 if the ratio is not restored to above 150%
Hong Kong	Indices and overseas single stocks (currently expanding to non dual-listed HK stocks)	Within +/-2.0x (Dynamic leverage allowed since Aug 2026)	No regulatory requirements; In practice varying by stock (20%-60%; typically 30% for liquid blue chips)	3.3x	Varying by stock/broker (typically 15% for liquid blue chips)	Broker discretion	Broker discretion
Taiwan	Indices	Within +/-2.0x	40% (Listed stocks)	2.5x	~23% (implied from 130% Maintenance Collateral Ratio)	T+2	Forced liquidation at the market open on T+3
Korea	Indices and single stocks (onshore single-stock ETFs launched May 2026)	Within +/-2.0x ^{^^^}	40% (Base rate; brokerages dynamically adjust based on stock liquidity and volatility)	2.5x	~29% (implied from 140% Maintenance Collateral Ratio)	T+1 midnight	Forced liquidation at the market open on T+2
Japan	Mainly indices	Within +/-2.0x	30% (with a minimum account equity requirement of JPY 300,000)	3.3x	20% ([^] Equity to Total Market Value Ratio; some brokers set internal limits at 25% or 30%)	T+1	Forced liquidation at the market open on T+2

Note: [^]Equity to Total Market Value Ratio = $\frac{\text{Equity Value}}{\text{Market Value of All Margined Positions}}$; ^{^^}Collateral Ratio = $\frac{\text{Collateral Value}}{\text{Margin Loan}}$; ^{^^^}FSC is seeking emergency powers to lower to 1.5x or suspend during periods of high volatility.

5) Retail investors' sentiment

In 2025, we introduced a barometer to measure the risk appetite of retail investors who account for 70% of average daily turnover in A shares despite the gradual rise of institutional sponsorship led by domestic mutual, pension, and insurance funds. Besides margin financing statistics, the barometer sums up 11 other high-frequency indicators such as new investor accounts, IPO subscription statistics, and turnover velocity across the speculative length, equity allocation, trading propensity categories to forge a more complete picture on local investor sentiment. Our barometer currently stands at 0 s.d. relative to the past 1-year range, correcting from ~1 s.d. from a month ago, pointing to **neutral to somewhat subdued risk appetite among A-share individual investors**.

Exhibit 15: A-share retail sentiment has quickly deteriorated in the past month

Source: Wind, CSF, SSE, SZSE, ICBC, Goldman Sachs Global Investment Research

6) Institutional investors' positioning

Domestic mutual fund industry has amassed close to Rmb40tn of AUM, of which Rmb7tn is allocated to equities, accounting for 6.6%/15% of the total outstanding/free-float market cap. Cash ratios for equity mutual funds have edged higher amid the market gyrations, but their **allocations to and positioning (i.e. over- or underweight) in Tech equities** (including Semiconductors, Hardware and Software companies that are exposed to the AI theme) **still hover at historical peak levels**. Systematic investors or strategies, which have grown significantly in size and turnover representation in A shares in the past few years, may have gone through a **deeper de-leveraging or risk-reduction process** as reflected by the falling cash trading and funding spreads in the small-mid-cap cohort, both of which are commonly-followed proxies for quant funds' activity levels in A shares.

Exhibit 18: ...but are still heavily exposed to Tech equities in their portfolios

Source: Wind, Goldman Sachs Global Investment Research

Exhibit 19: Activity level of quant strategies in A shares seems to have slowed recently

Source: Wind, Goldman Sachs Global Investment Research

7) Corporate actions from listed companies

Corporate actions are often a leading indicator of equity returns. As such, we gauge the risk of further market correction via 3 corporate action channels—buybacks, trading warnings, and insider selling/buying. First, **stock repurchases have reached multi-year highs** in 3Q26 (quarterized), up 35% and 59% yoy in announced buyback deals and buyback amount (with the treasury shares being canceled in some cases), reflecting high management confidence in the company's intrinsic value. Second, **excessive price movement and abnormal trading warnings** from listed companies also surged in June before the correction, but has fallen substantially since then. Lastly, selling from significant shareholders and company executives across all listed A-share companies has returned to **more balanced levels, improving from net selling territory** for the most part in 1H26.

Exhibit 20: Share buybacks reached recent-year highs in 3Q26

Exhibit 21: Excessive price and trading risk warnings from listed companies surged before the correction but have fallen significantly since then

Source: Wind, Goldman Sachs Global Investment Research

Exhibit 22: Net equity selling from major shareholders and executives has returned to more balanced territory

Source: Wind, Goldman Sachs Global Investment Research

8) Policy rhetoric and stance on the equity market

Abrupt policy tightening measures were often a key reason for market reversal in previous China equity bull runs, notably the leverage unwind sell-off in 2015 and the regulatory tightening towards the private sector in late 2020. By the same token, policy actions and signals, and policymakers' attitude/language towards the equity market have triggered many powerful equity rallies in history, including the 9/24 "policy pivot" 2 years ago. Similar to many of our text-based analytical tools, we dissect and interpret policy statements and regulators' public announcements systematically using our large-language-model (LLM), which enables us to quantify policy risk and support in both frequency and magnitude terms. This exercise leads us to believe that **policymakers' perceived market overheating and the resulting policy tightening risks indeed reached a cycle peak in 1Q26 but have since fallen back to a more neutral range.**

Exhibit 23: Equity market policy stance seems to be tightened in recent months

Source: CSRC, SSE, SZSE, Goldman Sachs Global Investment Research

9) The Chinese National team

Established in the aftermath of the 2015 market fall, the broadly-defined Chinese National Team currently holds around Rmb5tn worth of A-share equities on our estimate, mostly in single-stock holdings, equivalent to 5% of the total outstanding listed A-share market cap. Historically, it has acted as a counter-cyclical stabilizer to onshore equities, effectively underwriting a downside put to investors when the market is under stress. But when equity returns are strong and valuations are deemed as less compelling, the National Team has shown no hesitation of selling into strength and taking profit. Per our National Team tracker, we estimate that **it has net bought more than Rmb140bn worth of A-share equities, including modest buying of STAR50 ETFs, in the past 3 weeks, after selling about Rmb1.5tn in the prior 6 months**. Importantly, the scale of National Team's buying has historically been well correlated with subsequent market returns, with large-scale intervention (>1.5 s.d. in weekly net purchases) typically marking a medium-term bottom for the broader market.

Exhibit 24: The National Team has turned into a net buyer of A-share equities in recent weeks

Source: Wind, Goldman Sachs Global Investment Research

Exhibit 25: Empirically, large (>1.5 s.d.) NT buying tended to correlate with decent market returns in the ensuing months

Source: Wind, Goldman Sachs Global Investment Research

10) Capex and earnings revisions

Fundamentally, the AI capex boom globally is the fuel behind the outsized gains of AI-related stocks in China and abroad—on GS estimates, **total AI expenditures from 9 major US and Chinese hyperscalers/CSPs could top US\$900bn this year and US\$1.3tn next**, 1.7% and 2.3% of the combined US and China GDP. The outlays have ushered in powerful revenue and earnings impulses that ripple through the global AI value-added chain, spanning Korean memory names, Taiwanese foundry, Japanese semi materials and equipment suppliers, and Chinese tech firms in the Power and Infra cohorts. 2026 and 2027 consensus capex for the top-8 listed US and Chinese hyperscalers has indeed been raised by 32% and 75% ytd, in large part contributing to the 12%/22% FY26/27 profit upgrade in the Hard Tech cohort in the first 7 months of the year. That said, **the 2nd derivative of consensus capex growth would subsequently impact the trajectory of Hard Tech companies' profit growth profile**. As such, the capex guidance and AI development/monetization roadmap by Chinese and US hyperscalers in the forthcoming results season will be consequential in framing the AI narrative and investment strategy in the months ahead.

Exhibit 26: Consensus capex expectations for US and China hyperscalers have been revised up significantly ytd

Source: FactSet, MSCI, Goldman Sachs Global Investment Research

Exhibit 29: ...while that for Soft Tech may have room to improve cyclically

Source: FactSet, MSCI, Goldman Sachs Global Investment Research

Bottom-line: Rotation and diversification in focus

In sum, the above 10 indicators and signals suggest to us that a decent portion of the prior speculative length, valuation excess, leverage, and positioning concentration risk in Chinese AI Hard Tech has been compressed alongside the price correction cycle. With the fundamental case for AI and other liquidity trends remaining solid, we **maintain our constructive view on A shares (Overweight)** and the AI Hard Tech bias there on a **structural basis**.

Exhibit 30: We compiled 10 indicators to signal potential Hard Tech correction risks

Source: Goldman Sachs Global Investment Research

But, the latest drawdown has underscored importance of portfolio diversification in a volatile market where return correlations across asset classes, markets, and sectors are elevated. Specifically, we like the following 4 strategies to expose to idiosyncrasy and to potentially improve portfolios' Sharpe ratios within the Chinese equity universe:

- 1. Scaling into select H-share Soft Tech:** As detailed in our recent report—[Rotation Temptation—the tactical investment case for Offshore Internet and Soft Tech equities has turned incrementally more compelling](#), underpinned by their: a) substantial underperformance and wide relative return gaps vs. the Hard Tech peers; b) cycle-trough valuations which might have already discounted a fair amount of AI capex, regulatory, earnings risks; c) narrowing subsidy losses in the food delivery/instant consumption businesses; and, d) improving momentum in AI

monetization trends revolving around cloud, agentic AI, and token consumption. Our Hard vs Soft Tech Rotation Model indeed suggests that the latter could further recoup some of its underperformance in the months ahead.

2. **Policy beneficiaries in both the AI and non AI spaces:** While AI (development) is arguably a top priority for Chinese policymakers due to national security and growth considerations, their agenda is comprehensive and goes beyond just AI and Tech, notably biotech/pharma, services consumption, advanced manufacturing, and agriculture. Broadly, our 15th FYP portfolio, which features 50 select names in both the AI and non-AI categories that are well-aligned with strategic policy objectives in the 15th FYP, has continued to perform well in absolute return and Sharpe ratio terms despite heightened market volatility. In the AI space, besides owning a well-diversified portfolio along the extended AI value-added chain (e.g. our **Select AI Portfolio**), self-sufficiency (exports substitution/localization) should be a continued theme for investors to participate in the structural growth story of AI while adding diversification benefits to their AI-centric portfolios, as reflected by the **notable outperformance of domestic-oriented AI names vs. those that are mostly export-focused in the latest sell-off**.
3. **Earnings back in the driver's seat.** The relatively deep reversal of the EPS momentum factor vis-a-vis the Hard vs Soft Tech thematic divide indicates that some growthy names with solid earnings backing have been more severely impacted in this broad-based valuation and positioning reset than would otherwise be warranted by fundamentals. In Exhibit 34, we screen for **GS Buy-rated Tech and non-Tech names with above-sector average upward earnings revisions** in the past 1 month but trade at or below mid-cycle to re-engage the earnings delivery theme in the lead-up to the 2Q26/interim results season.
4. **Looking for alpha in the IPO market, and cash from the Shareholder Returns theme.** New IPOs in HK/China generally are still an efficient way for investors to generate alpha and uncorrelated returns at least in the short-term, with all new issuances across A- and H-share on median delivering 75% and 68% 1- and 3-month gains post listing ytd. While not as growthy and explosive as the AI story, the shareholder returns theme has weathered the correction cycle well, reinforcing our long-standing view that it should be a core part of investors' portfolio, especially on our forecast that total cash returns to shareholders from listed Chinese corporates via dividends and buybacks could top Rmb4tn (another all-time high) in FY26.

Appendix

Exhibit 35: Key words we analyze in our Policy Risk Barometer

Policy Direction	Intensity Level	Target Score	Chinese Keywords / Phrases	English Translation	Regulatory Context & Justification
Tightening	Extreme	1	暂停IPO / 暂缓新股发行	Suspend IPOs	High-impact administrative interventions that freeze primary market financing, forcibly deleverage the secondary market, or restrict major shareholders' liquidity.
			清理场外配资 / 伞形信托	Clear OTC margin lending	
			实施熔断机制	Implement circuit breakers	
	Moderate	0.5	最严减持新规 / 限制减持	Strictest share reduction ban	Targeted restrictive measures aimed at cooling down speculative trading, reducing leverage, or punishing specific market misconduct.
			提高融资保证金比例	Raise margin requirements	
			限制高频量化交易 / 异常交易	Restrict high-frequency quant trading	
Easing	Mild	0.1	严查带病申报 / 现场检查	Strict IPO onsite inspections	Routine supervisory actions, disclosure enhancements, and administrative inquiries with low immediate liquidity impact.
			立案调查 / 顶格处罚	Filing investigation / Maximum penalty	
			发布合规指引 / 问询函	Issue compliance guidelines / Inquiries	
	Moderate	-0.5	加强信息披露监管	Strengthen disclosure supervision	Standard administrative procedures, regular market operations, or neutral structural updates.
			规范日常运作	Normalize daily operations	
			保持常态化发行	Maintain normalized IPO issuance	
Neutral	Neutral	0	日常人事变动	Routine personnel changes	Minor cost-reduction measures or incremental operational improvements that marginally lower friction for market participants.
			发布年度工作报告	Publish annual reports	
			减价上市费用 / 经手费	Reduce listing / transaction fees	
	Mild	-0.1	优化跨境资格互认	Optimize cross-border recognition	Structural reforms designed to boost market liquidity, encourage corporate restructuring, and expand the institutional investor base.
			常规制度优化	Routine institutional optimization	
			放宽两融标的范围	Broaden margin trading targets	
Easing	Moderate	-0.5	简化并购重组审批	Simplify M&A approvals	Heavyweight, systemic interventions that directly inject massive liquidity, lower transaction taxes, or deploy state capital to stabilize the market.
			引导中长期资金入市	Guide long-term funds into market	
			支持红筹企业回归	Support red-chip listings	
	Extreme	-1	减半征收证券交易印花税	Halve securities stamp duty	
			国家队直接入市 / 汇金增持	National Team direct buying	
			创设证券基金保险公司互换便利	Establish SFISF swap facility

Unless otherwise stated, the individuals listed in the Contributing Authors disclosure of this report are analysts in Goldman Sachs' Global Investment Research division.

Disclosures

Baskets disclosure

The ability to trade the basket(s) in this report will depend upon market conditions, including liquidity and borrow constraints at the time of trade.

MSCI disclosure

All MSCI data used in this report is the exclusive property of MSCI, Inc. (MSCI). Without prior written permission of MSCI, this information and any other MSCI intellectual property may not be reproduced or disseminated in any form and may not be used to create any financial instruments or products or any indices. This information is provided on an "as is" basis, and the user of this information assumes the entire risk of any use made of this information. Neither MSCI, any of its affiliates nor any third party involved in, or related to, computing or compiling the data makes any express or implied warranties or representations with respect to this information (or the results to be obtained by the use thereof), and MSCI, its affiliates and any such third party hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of this information. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates or any third party involved in, or related to, computing or compiling the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. MSCI and the MSCI indexes are service marks of MSCI and its affiliates. The Global Industry Classification Standard (GICS) were developed by and is the exclusive property of MSCI and Standard & Poor's. GICS is a service mark of MSCI and S&P and has been licensed for use by The Goldman Sachs Group, Inc.

Logos disclosure

Third party brands used in this presentation are the property of their respective owners, and are used here for informational purposes only. The use of such brands should not be viewed as an endorsement, affiliation or sponsorship by or for Goldman Sachs or any of its products/services.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at <https://www.gs.com/worldwide/brazil/area/gir/index.html>. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 10th Floor, Ascent-Worli, Sudam Kalu Ahire Marg, Worli, Mumbai-400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of

the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. Registration granted by SEBI and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors. Goldman Sachs (India) Securities Private Limited compliance officer and investor grievance contact details, a copy of the annual compliance audit report and other relevant information and disclosures can be found at this link: <https://www.goldmansachs.com/worldwide/india/research-analyst>. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for “professional investors” within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither “registered banks” nor “deposit takers” (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for “wholesale clients” (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom’s departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at <https://www.gs.com/disclosures/europeanpolicy.html> which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, and Investment Management Association of Japan. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Global product; distributing entities

Goldman Sachs Global Investment Research produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. Available Weekdays (except holidays), from 9am to 6pm. Canal de Comunicação com o Público Goldman Sachs Brasil: 0800 727 5764 e/ou contatogoldmanbrasil@gs.com. Horário de funcionamento: segunda-feira à sexta-feira (exceto feriados), das 9h às 18h; in Canada by Goldman Sachs & Co. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom.

Goldman Sachs International (“GSI”), authorised by the Prudential Regulation Authority (“PRA”) and regulated by the Financial Conduct Authority (“FCA”) and the PRA, has approved this research in connection with its distribution in the United Kingdom.

European Economic Area: Goldman Sachs Bank Europe SE (“GSBE”) is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research within the European Economic Area.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst’s judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is focused on investment themes across markets, industries and sectors. It does not attempt to distinguish between the prospects or performance of, or provide analysis of, individual companies within any industry or sector we describe.

Any trading recommendation in this research relating to an equity or credit security or securities within an industry or sector is reflective of the investment theme being discussed and is not a recommendation of any such security in isolation.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
