Upsides from neoclouds in the late GB300 cycle

More aggressive capex from neoclouds, with moderate upsides from CSPs and more announcements from AMD

Near-term upsides from neoclouds will mitigate GB-VR transition impact in 2H26F

In *our prior anchor report on Asia AI Semi & Server in June 2026*, we forecasted a product transition impact on AI server rack shipments during 2Q-3Q26F for nVidia's (NVDA US, Not rated) GB300 migration to VR200, as we observed that top CSPs would prefer to wait for new generation products, such as VR200, for better cost/performance, and we expected neoclouds will play a more important role to supply/lease more computing power to CSPs during this transitional period.

While we were right about neoclouds' capex upside on GB300, we underestimated the purchasing power from neoclouds, especially xAI (unlisted), which is now under SpaceX (SPCX US, Not rated). SpaceX listed on 12 June and raised a total of USD85.7bn. In late-June, SpaceX further announced to raise USD25bn in a debt sales. As shown in our Anchor Report – *Global satellites – Fusion of satellites, connectivity, and AI*, dated 13 June, SpaceX estimates a total addressable market (TAM) of USD28.5tn, with USD370bn from space, USD1.6tn from connectivity, and a majority USD26.5tn from AI. SpaceX plans to prioritize growth and investment to capture the opportunities in AI applications and compute infrastructure. SpaceX's capex grew 144%/86% in 1Q26/2025 to USD10.1bn/USD20.7bn, mainly driven by rising investments in the AI segment. AI capex consumed the largest portion of SpaceX's capex in 1Q26/2025 (61%/76% total capex), reaching USD7.7bn/12.7bn in 1Q26/2025, according to the company's prospectus.

From our supply chain observations, SpaceX/xAI raised its AI server rack orders to Dell (DELL US, Not rated) and Supermicro (SMCI US, Neutral) several times in late-May to early July. We believe total GB300 orders from xAI to related suppliers in 2026F could exceed 13k racks, much higher than our original 6-8k racks. And, the split of 1H:2H26F could be 3-5k:8-10k. We believe the order increase benefits for related components will concentrate in 3Q26F to early-4Q26F, and final rack delivery will be more smooth between 3Q26F and 4Q26F, or even 1Q27F.

Our view is echoed by Supermicro's *preliminary business update* for 4QFY26E (ending in Jun-26) on 21 July (*Fig. 1*), in which management estimated quarterly revenue to be near the low end of guidance (USD11.0-12.5bn) but non-GAAP GM to be in the range of 15-17% vs. guidance of 8.2-8.4% primarily supported by a favorable customer and product mix. In addition to a record backlog exiting the prior quarter, Supermicro noted further rising backlog level at the end of the fiscal quarter given total new order intakes in excess of USD60bn during 4QFY26E (ending in Jun-26), vs USD39bn viewed in early June, which are expected to be delivered over future quarters.

If we calculate the incremental increase of Supermicro's order backlog from USD39bn in early June to USD60bn in end-June, the USD21bn increase is roughly equivalent to 4.5-5.3k racks of GB300, if we assume a rack of GB300 is priced at USD4-4.5mn.

We also noticed similar sales strength/upsides from neocloud-related supply chain in June/2Q26F, such as Gigabyte (2376 TT, Buy; 2Q26 revenue beat our estimate by 20%), Wistron (3231 TT, Buy; 2Q26 revenue beat our forecast by 4%), and Asustek (2357 TT, Not rated; June revenue +54% m-m, +56% y-y, with 2Q26 revenue beating Bloomberg consensus estimate by 7%). Please note Nebius (NBIS US, Not rated) is a major customer of Gigabyte and Asustek, and Dell is a major client of Wistron.

AMD strengthening its strategic partnerships with OpenAI, Meta, and Anthropic, through MI450-series

We have been flagging AMD's (AMD US, Not rated) rising traction in MI455 and notice AMD's top customers for MI455 are **OpenAI** (unlisted; through Oracle [ORCL US, Not rated] and **Microsoft** [MSFT US, Not rated]), **Meta** (META US, Not rated), **Anthropic** (unlisted), and **several neoclouds** (report). With MI455 getting ready, various cloud companies recently announced more detailed cooperation with AMD, as shown in Fig. 2.

- Oracle first announced to deploy AMD's MI450-series GPUs, with an initial deployment of 50k starting in 3Q26 and expanding in 2027E and beyond (news).
- OpenAI announced to deploy multiple generations of AMD AI GPUs to power 6GW compute capacity, starting with MI450 GPUs in 2H26E (news).
- Meta will deploy multiple generations of AMD AI GPUs to power 6GW compute capacity, starting with customized MI450 GPUs in 2H26E (news).
- Microsoft is adopting AMD Helios rack solutions powered by MI455X (news).
- AMD and Anthropic announced a strategic partnership with AMD committing to up to USD5bn equity investments and Anthropic deploying 2GW of AMD Helios MI450 starting 1H27E (news).

If we assume 1GW datacenter deployment roughly requires of 250k MI450 chips by assuming certain redundancy, OpenAI and Meta's 6GW multi-year deployment plans will require roughly 167k CoWoS wafer each.

Anthropic's 2GW MI450 series deployment is roughly equivalent to 500k MI450 chips, or 6.9k racks in 2027F, and consumes 55.6k CoWoS wafers, accounting for 40% of our 138k CoWoS wafer assumption for AMD's MI-series in 2027F.

We are not sure how many years OpenAI and Meta's plans will take to complete. However, if the plans are split into only two to three years, our 138k CoWoS wafer assumption may not be enough to serve for OpenAI, Meta, and Anthropic in 2027F.

Fig. 2: Announced deployments of AMD MI450 series GPUs

Company	Announcement timeline	Deployment scale Chip (units)	Capacity (GW)	Deployment start	Implied CoWoS wafer demand (kpcs; if all MI450)	Remarks
Oracle	10/14/2025	50,000		3Q26	6	50k units of MI450 series.
OpenAI	10/6/2025		6	2H26	167	Multiple generations of AMD AI GPU.
Meta	2/24/2026		6	2H26	167	Multiple generations of AMD AI GPU.
Microsoft	7/20/2026	TBA		TBA		Adoption of MI455X Helios.
Anthropic	7/22/2026		2	1H27	56	MI450 series Helios.

Note: AMD MI455 Helios TDP could range in 225-245kW; we assume some redundancy in deriving implied GPU units.
Source: Company data, Nomura estimates

We raise our nVidia downstream module/rack assumptions to capture the upside from GB300

We maintain our CoWoS volume and allocation forecasts published in our *Asia AI Semi & Server anchor report in June*. However, **in light of the recent order upsidess from neoclouds and some recovery of Meta's GB300 rack shipments in 2H26F, we raise our module and rack shipment assumptions for nVidia.**

For 2026F, **we raise our GB/VR rack shipment assumption from 54.5k units to 62k units for 2026F** (see Fig. 4). Of this, we assume VR200 to account for 15% in 2026F (vs prior 15-20%), with concentration in 4Q26F, as we observe the module level ramp of VR200 is 1-2 months later than original expectation, if no further delay, and recent order increases are

mostly on GB300. We expect the delivery of the newly added GB300 racks will likely extend from 2H26F to 1Q27F, and the sizes of the new orders are large enough to mitigate the GB-to-VR transitional impacts in 2H26F, which we were concerned about earlier.

We also moderately **raise our 2027F GB/VR racks to 66k** vs prior 62k racks, with upsides coming from GB300, pushed out of VR200 rack delivery, and a potential transition from Rubin to Rubin Ultra happening in 2Q27F.

Our HGX vs GB/VR mix assumption for nVidia modules is shifting more to GB/VR types, from HGX, as a large portion of the new orders is in the GB300 configuration. We change our HGX:GB/VR mix assumption to 27%/73% for 2026F, vs our previous estimate of 30%/70%. **For 2027F, we tweak our HGX:GB/VR mix assumption to 19%:81%**, from prior 20%:80%, as we consider the new GB300 orders and believe VR200 demand will outpace supply in the initial stage.

Potential neocloud beneficiaries – Wistron, Bizlink, Auras, AVC, Delta, Lite-On, and Gigabyte

We believe recent downstream AI server order upsides from neoclouds will provide more benefit to “downstream” components (e.g., power, thermal, cable/connector) and ODMs as their shipments are linked to rack shipments, rather than CoWoS output. The order catch-up in downstream will help to eliminate the upstream and downstream buffer/gap, as shown in *Fig. 4*.

We believe xAI mainly gives orders to Dell and Supermicro, and SpaceX is also evaluating to approach ODMs (*news*), such as **Hon Hai (2317 TT, Buy)**, as a potential diversification of supply, in light of its growing demand. We believe **Wistron (3231 TT, Buy)** will benefit, as it supplies L10 of GB300/VR200 for Dell. **Gigabyte (2376 TT, Buy)** also has sizeable neocloud exposure through its supply to Nebius, and may potentially benefit from this trend.

For components, we notice that Dell and Supermicro mainly purchase power supply units (PSU) of GB300 from Taiwan-based suppliers, such as **Delta (2308 TT, Buy)** and **Lite-On (2301 TT, Buy)**. **Auras (3324 TT, Buy)** is one of the major cold plate suppliers to Supermicro and also supplies some to Dell. **AVC (3017 TT, Buy)** also has some share in Dell and Supermicro.

We remain positive on **Bizlink (3665 TT, Buy, covered by Kenny Chen)** with growing content value of power and data cabling, given higher power consumption and data transmission in next-generation AI datacenter/servers (both for GPU and ASIC platform) in 2026-28F. Our recent market survey suggests the headwind for 1Q26 GM erosion, caused by a temporary HPC product's delivery pause, has been largely resolved entering 2Q26F; in addition, the customer's demand not only resumed in 2Q26F but also accelerate its AI infrastructure spending, which in our view should benefit Bizlink's 2H26-1H27F AEC revenue growth and GM recovery. We believe after *the acquisition of Interplex (unlisted) in 2H26F*, Bizlink's dollar content value and product offerings in AI datacenter/servers should grow further, with a higher market share in 2027-28F vs in 2025-26F.

Potential beneficiaries of AMD MI450

Recent strategic announcements from AMD and top cloud/AI customers may imply upside to our CoWoS assumption for AMD in 2027F, but the ambiguity of the multi-year deployment plans with OpenAI and Meta make us not change our CoWoS assumptions at this moment. We will wait for clarity regarding the patterns of deployment in the next few years. But sentiment-wise, those partnerships could be positive for the AMD MI450 supply chain. We believe **Wiwynn (6669 TT, Buy)** is the major ODM of MI450 for Meta; **EMC (2383 TT, Buy)** is one of the major CCL suppliers; **SCC (002916 CH, Buy; covered by Bing Duan)** is a major supplier of MI4xx motherboard; **Wistron** is the mass production assembler of MI4xx UBB modules; **Delta** is a major supplier of 12kW PSU; and **AVC** is one of the major thermal component suppliers.

NGFP, NDPI, and Nlplc are generally engaged in the trading of swaps and other derivative products, any of which may be the subject of this report.

Distribution of ratings (Nomura Group)

The distribution of all ratings published by Nomura Group Global Equity Research is as follows:

58% have been assigned a Buy rating which, for purposes of mandatory disclosures, are classified as a Buy rating; 33% of companies with this rating are investment banking clients of the Nomura Group*. 0% of companies (which are admitted to trading on a regulated market in the EEA) with this rating were supplied material services** by the Nomura Group.

39% have been assigned a Neutral rating which, for purposes of mandatory disclosures, is classified as a Hold rating; 57% of companies with this rating are investment banking clients of the Nomura Group*. 0% of companies (which are admitted to trading on a regulated market in the EEA) with this rating were supplied material services by the Nomura Group

3% have been assigned a Reduce rating which, for purposes of mandatory disclosures, are classified as a Sell rating; 15% of companies with this rating are investment banking clients of the Nomura Group*. 0% of companies (which are admitted to trading on a regulated market in the EEA) with this rating were supplied material services by the Nomura Group.

As at 30 June 2026.

*The Nomura Group as defined in the Disclaimer section at the end of this report.

** As defined by the EU Market Abuse Regulation

Definition of Nomura Group's equity research rating system and sectors

The rating system is a relative system, indicating expected performance against a specific benchmark identified for each individual stock, subject to limited management discretion. An analyst's target price is an assessment of the current intrinsic fair value of the stock based on an appropriate valuation methodology determined by the analyst. Valuation methodologies include, but are not limited to, discounted cash flow analysis, expected return on equity and multiple analysis. Analysts may also indicate expected absolute upside/downside relative to the stated target price, defined as (target price - current price)/current price.

STOCKS

A rating of '**Buy**', indicates that the analyst expects the stock to outperform the Benchmark over the next 12 months. A rating of '**Neutral**', indicates that the analyst expects the stock to perform in line with the Benchmark over the next 12 months. A rating of '**Reduce**', indicates that the analyst expects the stock to underperform the Benchmark over the next 12 months. A rating of '**Suspended**', indicates that the rating, target price and estimates have been suspended temporarily to comply with applicable regulations and/or firm policies. Securities and/or companies that are labelled as '**Not rated**' or shown as '**No rating**' are not in regular research coverage. Investors should not expect continuing or additional information from Nomura relating to such securities and/or companies. Benchmarks are as follows: **United States/Europe/Asia ex-Japan**: please see valuation methodologies for explanations of relevant benchmarks for stocks, which can be accessed at: <http://go.nomuranow.com/research/m/Disclosures>; **Global Emerging Markets (ex-Asia)**: MSCI Emerging Markets ex-Asia, unless otherwise

stated in the valuation methodology; **Japan:** Russell/Nomura Large Cap.

SECTORS

A **'Bullish'** stance, indicates that the analyst expects the sector to outperform the Benchmark during the next 12 months. A **'Neutral'** stance, indicates that the analyst expects the sector to perform in line with the Benchmark during the next 12 months. A **'Bearish'** stance, indicates that the analyst expects the sector to underperform the Benchmark during the next 12 months. Sectors that are labelled as **'Not rated'** or shown as **'N/A'** are not assigned ratings. Benchmarks are as follows: **United States:** S&P 500; **Europe:** Dow Jones STOXX 600; **Global Emerging Markets (ex-Asia):** MSCI Emerging Markets ex-Asia. **Japan/Asia ex-Japan:** Sector ratings are not assigned.

Target Price

A Target Price, if discussed, indicates the analyst's forecast for the share price with a 12-month time horizon, reflecting in part the analyst's estimates for the company's earnings. The achievement of any target price may be impeded by general market and macroeconomic trends, and by other risks related to the company or the market, and may not occur if the company's earnings differ from estimates.

The Nomura Group does not provide tax advice.

The Nomura Group, and/or its officers, directors, employees and affiliates, may, to the extent permitted by applicable law and/or regulation, deal as principal, agent, or otherwise, or have long or short positions in, or buy or sell, the securities, commodities or instruments, or options or other derivative instruments based thereon, of issuers or securities mentioned herein. The Nomura Group companies may also act as market maker or liquidity provider (within the meaning of applicable regulations in the UK) in the financial instruments of the issuer. Where the activity of market maker is carried out in accordance with the definition given to it by specific laws and regulations of the US or other jurisdictions, this will be separately disclosed within the specific issuer disclosures.

This document may contain information obtained from third parties, including, but not limited to, ratings from credit ratings agencies such as Standard & Poor's. The Nomura Group hereby expressly disclaims all representations, warranties or undertakings of originality, fairness, accuracy, completeness, correctness, merchantability or fitness for a particular purpose with respect to any of the information obtained from third parties contained in this material or otherwise arising in connection therewith, and shall not be liable (in negligence or otherwise, and in whole or in part) for any direct, indirect, incidental, exemplary, compensatory, punitive, special or consequential damages, costs, expenses, legal fees, or losses (including lost income or profits and opportunity costs) in connection with any use or misuse of any of the information obtained from third parties contained in this material or otherwise arising in connection therewith. Reproduction and distribution of third-party content in any form is prohibited except with the prior written permission of the related third-party. Third-party content providers do not, express or implied, guarantee the fairness, accuracy, completeness, correctness, timeliness or availability of any information, including ratings, and are not in any way responsible for any errors or omissions (negligent or otherwise), regardless of the cause, or for the results obtained from the use or misuse of such content. Third-party content providers give no express or implied warranties, including, but not limited to, any warranties of merchantability or fitness for a particular purpose or use. Third-party content providers shall not be liable (in negligence or otherwise, and in whole or in part) for any direct, indirect, incidental, exemplary, compensatory, punitive, special or consequential damages, costs, expenses, legal fees, or losses (including lost income or profits and opportunity costs) in connection with any use or misuse of their content, including ratings. Credit ratings are statements of opinions and are not statements of fact or recommendations to purchase hold or sell securities. They do not address the suitability of securities or the suitability of securities for investment purposes, and should not be relied on as investment advice. Any MSCI sourced information in this document is the exclusive property of MSCI Inc. ('MSCI'). Without prior written permission of MSCI, this information and any other MSCI intellectual property may not be duplicated, reproduced, re-disseminated, redistributed or used, in whole or in part, for any purpose whatsoever, including creating any financial products and any indices. This information is provided on an "as is" basis. The user assumes the entire risk of any use made of this information. MSCI, its affiliates and any third party involved in, or related to, computing or compiling the information hereby expressly disclaim all representations, warranties or undertakings of originality, fairness, accuracy, completeness, correctness, merchantability or fitness for a particular purpose with respect to any of this material or the information contained in this material or otherwise arising in connection therewith. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates or any third party involved in, or related to, computing or compiling the information have any liability (in negligence or otherwise, and in whole or in part) for any damages of any kind. MSCI and the MSCI indexes are services marks of MSCI and its affiliates.

The intellectual property rights and any other rights, in Russell/Nomura Japan Equity Index belong to Nomura Fiduciary Research & Consulting Co., Ltd. ("NFRC") and FTSE Russell ("Russell"). NFRC and Russell do not guarantee fairness, accuracy, completeness, correctness, reliability, usefulness, marketability, merchantability or fitness of the Index, and do not account for business activities or services that any index user and/or its affiliates undertakes with the use of the Index.

Investors should consider this document as only a single factor in making their investment decision and, as such, the report should not be viewed as identifying or suggesting all risks, direct or indirect, that may be associated with any investment decision. Nomura Group produces a number of different types of research product including, among others, fundamental analysis and quantitative analysis; recommendations contained in one type of research product may differ from recommendations contained in other types of research product, whether as a result of differing time horizons, methodologies or otherwise. The Nomura Group publishes research product in a number of different ways including the posting of product on the Nomura Group portals and/or distribution directly to clients. Different groups of clients may receive different products and services from the research department depending on their individual requirements.

Figures presented herein may refer to past performance or simulations based on past performance which are not reliable indicators of future or likely performance. Where the information contains an expectation, projection or indication of future performance and business prospects, such forecasts may not be a reliable indicator of future or likely performance. Moreover, simulations are based on models and simplifying assumptions which may oversimplify and not reflect the future distribution of returns. Any figure, strategy or index created and published for illustrative purposes within this document is not intended for "use" as a "benchmark" as defined by the European Benchmark Regulation. Certain securities are subject to fluctuations in exchange rates that could have an adverse effect on the value or price of, or income derived from, the investment.

With respect to Fixed Income Research: Recommendations fall into two categories: tactical, which typically last up to three months; or strategic, which typically last from 6-12 months. However, trade recommendations may be reviewed at any time as circumstances change. 'Stop loss' levels for trades are also provided; which, if hit, closes the trade recommendation automatically. Prices and yields shown in recommendations are taken at the time of submission for publication and are based on either indicative Bloomberg, LSEG or Nomura prices and yields at that time. The prices and yields shown are not necessarily those at which the trade recommendation can be implemented.

The securities described herein may not have been registered under the US Securities Act of 1933 (the '1933 Act'), and, in such case, may not be offered or sold in the US or to US persons unless they have been registered under the 1933 Act, or except in compliance with an exemption from the registration requirements of the 1933 Act. Unless governing law permits otherwise, any transaction should be executed via a Nomura entity in your home jurisdiction.

This document has been approved for distribution in the UK as investment research by Nlplc. Nlplc is authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority. Nlplc is a member of the London Stock

Exchange. This document does not constitute a personal recommendation within the meaning of applicable regulations in the UK, or take into account the particular investment objectives, financial situations, or needs of individual investors. This document is intended only for investors who are 'eligible counterparties' or 'professional clients' for the purposes of applicable regulations in the UK, and may not, therefore, be redistributed to persons who are 'retail clients' for such purposes.

This document has been approved for distribution in the European Economic Area as investment research by Nomura Financial Products Europe GmbH ("NFPE"). NFPE is a company organized as a limited liability company under German law registered in the Commercial Register of the Court of Frankfurt/Main under HRB 110223. NFPE is authorized and regulated by the German Federal Financial Supervisory Authority (BaFin).

This document has been approved by NHHK, which is regulated by the Hong Kong Securities and Futures Commission, for distribution in Hong Kong by NHHK. This document is intended only for investors who are 'professional investors' for the purposes of applicable regulations in Hong Kong and may not, therefore, be redistributed to persons who are not 'professional investors' for such purposes.

This document has been approved for distribution in Australia by NAL, which is authorized and regulated in Australia by the ASIC.

This document has also been approved for distribution in Malaysia by NSM.

In Singapore, this document has been distributed by NSL, an exempt financial adviser as defined under the Financial Advisers Act (Chapter 110), among other things, and regulated by the Monetary Authority of Singapore. NSL may distribute this document produced by its foreign affiliates pursuant to an arrangement under Regulation 32C of the Financial Advisers Regulations. This document is intended for accredited, expert or institutional investors as defined by the Securities and Futures Act (Chapter 289). Where the recipient of this document is not an accredited, expert or institutional investor, NSL accepts legal responsibility for the contents of this document in respect of such recipient only to the extent required by law. Recipients of this document in Singapore should contact NSL in respect of matters arising from, or in connection with, this document. THIS DOCUMENT IS INTENDED FOR GENERAL CIRCULATION. IT DOES NOT TAKE INTO ACCOUNT THE SPECIFIC INVESTMENT OBJECTIVES, FINANCIAL SITUATION OR PARTICULAR NEEDS OF ANY PARTICULAR PERSON. RECIPIENTS SHOULD TAKE INTO ACCOUNT THEIR SPECIFIC INVESTMENT OBJECTIVES, FINANCIAL SITUATION OR PARTICULAR NEEDS BEFORE MAKING A COMMITMENT TO PURCHASE ANY SECURITIES, INCLUDING SEEKING ADVICE FROM AN INDEPENDENT FINANCIAL ADVISER REGARDING THE SUITABILITY OF THE INVESTMENT, UNDER A SEPARATE ENGAGEMENT, AS THE RECIPIENT DEEMS FIT. Unless prohibited by the provisions of Regulation S of the 1933 Act, this material is distributed in the US, by NSI, a US-registered broker-dealer, which accepts responsibility for its contents in accordance with the provisions of Rule 15a-6, under the US Securities Exchange Act of 1934. The entity that prepared this document permits its separately operated affiliates within the Nomura Group to make copies of such documents available to their clients.

This document has not been approved for distribution to persons other than 'Authorised Persons', 'Exempt Persons' or 'Institutions' (as defined by the Capital Markets Authority) in the Kingdom of Saudi Arabia ('Saudi Arabia') or a 'Market Counterparty' or a 'Professional Client' (as defined by the Dubai Financial Services Authority) in the United Arab Emirates ('UAE') or a 'Market Counterparty' or a 'Business Customer' (as defined by the Qatar Financial Centre Regulatory Authority) in the State of Qatar ('Qatar') by Nomura Saudi Arabia, Nlplc or any other member of the Nomura Group, as the case may be. Neither this document nor any copy thereof may be taken or transmitted or distributed, directly or indirectly, by any person other than those authorised to do so into Saudi Arabia or in the UAE or in Qatar or to any person other than 'Authorised Persons', 'Exempt Persons' or 'Institutions' located in Saudi Arabia or a 'Market Counterparty' or a 'Professional Client' in the UAE or a 'Market Counterparty' or a 'Business Customer' in Qatar. Any failure to comply with these restrictions may constitute a violation of the laws of the UAE or Saudi Arabia or Qatar.
